ABSTRACT

Fall 1981 data on the salaries of 480 administrative faculty other than deans in baccalaureate and graduate programs in nursing are presented. Of the 256 schools that supplied data for a previous survey of nursing faculty salaries, 141 participated in the current administrative faculty salaries survey. All salary tables are presented on both an academic and calendar year basis. When there are sufficient numbers of administrative faculty in a group, data are presented for the 10th, 25th, 50th, 75th, and 90th percentile salaries. The number of individuals in each group is also shown with the percentile statistics. Utilizing the percentile format, salaries are presented for eight administrative faculty titles. In addition to all-school data, salary tables for administrative faculty are presented by region, institutional control, and size of nursing faculty. Separate tables show the titles and salaries of continuing education faculty. A small group of matrix tables are presented that include a breakdown of administrative faculty by degree level, academic rank, the number of individuals in each category, salaries at the 25th, 50th, 75th percentiles, and the mean. This format was utilized only for all-school tables showing salaries for associate deans, assistant deans and chairmen. Matrix tables include salaries for only the three highest academic ranks: professor, associate professor, and assistant professor. Appended materials include a questionnaire, a list of participating schools by region, and a U.S. map of American Association of Colleges of Nursing regions. (SW)

INTRODUCTION

Summary

This report on the salaries of 480 administrative faculty other than deans in baccalaureate and graduate programs in nursing is the third in AACN's 1981-82 salary series. It follows the publication of Nursing Faculty Salaries in January 1982 and Salaries of Nursing Deans in February 1982. Salaries which are presented in all three reports represent the fall of 1981. The above reports containing faculty and deans' salaries constitute a fourth annual review which the American Association of Colleges of Nursing initiated in 1978-79. Although opportunity was provided for salaries of "other administrative faculty" to be identified in the 1978-79 survey, the size of the response and lack of precision in data did not make analysis or publication feasible. Thus, this is the third report on Salaries of Administrative Faculty in Nursing Excluding Deans. A map showing geographic regions is presented on page 19, followed by a list of schools which supplied data for this report beginning on page 20.

METHOD

Data Collection

A common Institutional Data form provided a framework for classification and presentation of salary data for all three reports. Thus, it was possible to examine the following as determinants of administrative salaries: the support category of the parent institution, title of the administrative position, geographic region, size of total faculty, educational preparation and academic rank of the administrative faculty. The reverse side of the dean's questionnaire was utilized for listing titles, salaries and related information on the administrative group (see page 18).

Since 1980-81, the faculty salary questionnaires have included a "salary basis" column for each individual. This addition was of particular value to the classification of administrative faculty, who frequently serve on a calendar year basis while other faculty have academic year appointments. Instructions on the salary questionnaires stressed that administrative faculty must be identified and classified similarly as all-school faculty and on the special administrative faculty list. Although improvement was noted in 1981-82, following the above instructions apparently still is a problem for some schools.

The editing process last year identified another problem in that a small number of administrators who were listed did not have faculty rank. Telephone follow-up to schools verified that certain administrative personnel, for example some who were respons-

ible for continuing education programs or assistants to the dean, were not eligible for rank in line with institutional policy. Since these individuals, strictly speaking, were not administrative faculty, they were excluded from the report. Assistant administrators who served the dean's office but were not nurses also have been excluded.

Participating Schools

For the second year approximately one-half (55 percent) of the 256 schools which supplied data for the Report on Nursing Faculty Salaries are represented in this report. As would be expected, the majority of participants are the larger schools which have a number of administrative nurse faculty in addition to the dean. However, review of the list of institutions represented in this report (beginning page 20), indicates that some smaller schools, perhaps with only one assistant dean, also participated.

Last year's report showed that while the number of schools participating increased by 18 percent, the total administrative faculty involved increased very slightly (1.5 percent). In contrast, this report indicates an 11.9 percent increase in number of schools but a 19.4 percent increase in administrative faculty.

Titles

As in the case of the Report on Salaries of Nursing Deans, this report uses the term dean in a generic sense to identify the chief executive officer in a school or college of nursing. The reader may note one change in terminology in this report. In line with action voted by AACN membership during the past year, chairperson has been replaced by chairman. As in former years, administrators who carry a title in this general category are identified only as chair in tables in Group 1.

The wide variety of titles of administrative faculty has constituted a problem in analysis and presentation of data. The eight categories under which the titles were classified for presenting comparable salary data necessitated a special internal review to establish "equivalents." For example, in schools where the chief executive officer had the title of dean, directors or chairmen were "administrative personnel." However, when the title of director identified the top nursing position, an assistant director had to be equated with an assistant dean! The same internal review applied to data from schools where the chief executive officer had the title of chair or chairman. It was obvious that the same titles were used to describe different responsibilities in different schools. In some instances phone calls to schools were necessary in order to classify administrative faculty accurately.

In addition to the seven main titles under which salary data for administrative faculty are presented, it seemed necessary to utilize "other" for a smaller diversified group. Examples were: R.N. advisor, editor, educational planner, and clinical nurse facilitator. In reviewing the questionnaire prior to this and earlier surveys, some thought was given to providing a fixed group of titles with directions to assign positions to the most appropriate category. However, it seemed likely that schools might tend to create their own "other" categories thus adding to confusion rather than increasing specificity in the total report.

Acting or Interim Personnel

All positions which identified the title as acting were eliminated from processing and do not appear in this report. In line with thinking followed in the case of acting or interim deans, such personnel were regarded as serving in a temporary capacity; salaries therefore were assumed not to be typical of the administrative positions involved.

Salary Basis

To facilitate the reader's use of the information, all of the salary tables in this report are presented on both an academic and calendar year basis. The preparation of the two sets of salary tables involved conversion of final salary data from each school, whether on an academic or calendar year basis, to the other base. Thus, for tables based on the academic year, calendar year salaries were adjusted by multiplying by nine-elevenths, while academic year salaries were included without change. The series of tables representing calendar year salaries were created by multiplying academic year salaries by eleven-ninths, while including the calendar year salaries without change. The two sets of tables include the same schools and the same faculty; they differ only by these conversion factors.

Computer Processing

All data from the administrative salary questionnaire, after the editing and proofing described above, were key-punched and entered into the computer system for processing, identifying each school by an AACN code number. The file was then linked with institutional data in the AACN Data Bank, so that data for each institution and its administrative faculty were available together for processing. In this way, the basis adjustments for calendar year and academic year could be carried out by the computer, and selection by school characteristics could also be automatically performed. Statistical analysis and table preparation were done by computer programs as well.

Percentile Analysis

The format for a first group of tables is similar to those presented in the Report on Salaries of Nursing Deans. Specifically, where there are a sufficient number of administrative faculty in a group, data are presented for the 10th, 25th, 50th, 75th and 90th percentile salaries. These percentile salaries are those below which 10%, 25%, 50%, 75% and 90% of the salaries fall, respectively. By this definition, the 50th percentile is the median salary. The 25th percentile should be regarded as a low salary, and the 10th percentile should be regarded as a very low salary. The 75th percentile should be regarded as a high salary, and the 90th percentile as a very high salary. Percentile salaries have been rounded to the nearest hundred.

The number of individuals in each group is also shown with the percentile statistics. Where the number is small, it is not meaningful to calculate all the percentile values. Thus, the 10th and 90th percentiles have not been calculated where the number is less than eleven; the 25th and 75th percentiles have not been calculated where the number is less than five, and even the 50th percentile has not been reported when the number is less than three.

Following the above, a second group of tables are presented which utilize the matrix format from the Report on Nursing Faculty Salaries (pages 15-16). A key to these tables is on page 17.

RESULTS AND DISCUSSION

The tables which follow are of two types. Group 1, utilizing a percentile format, presents salaries for eight administrative faculty titles. In addition to All-School data, salary tables for administrative faculty are presented by regions, institutional control, and size of nursing faculty. Separate tables (12a and 12b) show the titles and salaries of continuing education faculty. Unlike AACN's other salary reports, tables in this report are presented in parallel fashion with (a) representing academic year salaries and (b) representing calendar year salaries.

Group 2 presents a small group of matrix tables of the type utilized in the Report on Nursing Faculty Salaries. These include a breakdown of administrative faculty by degree level, academic rank, the number of individuals in each category, salaries at the 25th, 50th, and 75th percentiles and the mean. This format was utilized (only) for All-School tables showing salaries for associate deans, assistant deans and chairmen. It also should be noted that Group 2 tables include salaries for only the three highest academic ranks: professor, associate professor, and assistant professor. As in Group 1, dual presentations for academic and calendar year salaries follow one another.

Discussion of the data on administrative faculty salaries will be limited to some general comments. The title of assistant dean was most prominent again this year in the All-School tables (1a and 1b), although the number of associate deans showed considerable increase. One could conjecture that the prominence of one title or another bears a relationship to the size of the school; however, the system of titles used in a college or university also could be responsible. Tables 6a-b, 7a-b, 8a-b showed 50th percentile salaries in private secular institutions to be slightly ahead of the public sector with private religious schools considerably lower. A review of 50th percentile salaries (Tables 9a-b, 10a-b, 11a-b) provides evidence that salaries increase with size of faculty.

In reviewing salaries in relation to titles, the reader is cautioned that variations in salaries may be caused by several factors. For instance, turnover in administrative faculty could result in a newly employed person receiving a lower salary. Conversely, an increase in doctorally prepared administrative faculty could be reflected in higher salaries. Similarly, a detailed comparison with AACN's 1980-81 Salaries of Administrative Faculty in Nursing, Excluding Deans would not be very productive since the list of participating schools as well as administrative faculty could vary considerably.

Tables 12a-b show that the number of schools reporting an administrative faculty member for continuing education (30.4 percent) dropped slightly from last year's report (35.7 percent in 1980-81). Half (51.1 percent) of these administrators held the title of director; 20.9 percent were assistant deans.

At the close of last year's report, member schools were asked to complete a reaction sheet indicating their perception of its value. Although the returns included some ambivalence, a majority hoped that the administrative faculty salary report would be continued. The sincerity of the schools' interest was further validated by the large increase in numbers of administrative faculty (19.4 percent) for whom salary data were presented this year.

KEY TO MATRIX SALARY TABLES*

25th percentile is $32,700

50th percentile is $35,300

75th percentile is $36,500

25th	$32,700	Number 44	44 Assistant Deans in this group
50th	$35,300		
75th	$36,500	Mean 34,907	Mean (average) salary is $34,907

17

Note on Computation of Percentile Statistics: The 25th, 50th or 75th percentile is that salary below which 25%, 50% or 75% of the salaries fall. By this definition, the 50th percentile is the median or middle salary. Percentile statistics have been rounded to the nearest hundred.

*The example is from Table 14b (all schools), calendar year salary for an Assistant Dean (Associate Professor) with doctorate. See page 16.

American Association of Colleges of Nursing

Eleven Dupont Circle • Suite 430 • Washington, D.C. 20036 • (202) 332-1917, 1918

1981-82 AACN ADMINISTRATIVE SALARY SURVEY

Completion of the Administrative Salary Survey is optional. If it is completed, it should include all full-time nursing faculty with major administrative responsibility. Do not include administrators who hold no academic rank. Whether it is completed or not, nursing faculty with administrative responsibility should be included on the Faculty Salary Survey forms.

List below the administrative titles (not the names) of faculty who carry major administrative responsibility.	DEGREE LEVEL (Circle only one number)		FACULTY RANK (Circle only one number)				TENURE STATUS (Circle only one number)		SALARY BASIS (Circle only one number)		SALARY	Line Number
